LSII85	Security and Crime Prevention Countermeasures	1
LSII90	Security Hardware & Bypass Techniques	1
LSII95	Tactical Lock (restricted enrollment)	8

**Supply Chain Security**

Academic Plan Code - 4301123030

The **Supply Chain Security** program provides an overview of the needs and requirements for a safe, secure supply chain. The program looks at threats, and offers solutions. The House Select Committee on Homeland Security issued a comprehensive assessment (February 2004) on the United State's levels of preparation against terrorist activity. The

(Courses are listed by category and not necessarily in the order to be taken)

Committee concluded in part "*Pathways to the United States by land, sea and air are insecure.*" Security throughout transportation, storage, shipping and receiving of cargo is addressed in this program. The concept of proactive verses reactive, planning and the overall needs of a security operation are discussed. Specific security systems are discussed, as well as the creation and implementation of security policies. Basic security equipment and procedures, including perimeter protection, intrusion detection, security surveys and CCTV systems are covered, as well as management issues to include terrorism, crisis management and basic guard force management. A Security Design section of the program looks at ways to maximize the security benefit within operational (financial and aesthetic) constraints.
